One-Piece Angler™ Pipe and Conduit Clamp

A whole new slant on time savings!

A difficult angle can make it time consuming to fit a clamp to a pipe or conduit. No more! The bent tab design of the Angler™ Pipe and Conduit Clamp from Thomas & Betts enables the bolt to extend up at a 30° angle, providing easy access with a screwdriver or power tool, even when clamps are installed side by side. Simply slide the pre-threaded bolt through the innovative keyhole-shaped opening and tighten. No need to unscrew bolt to install.

- One-piece design — no disassembly needed, no parts to lose or drop
- Fits snugly to EMT, rigid conduit, IMC, and same-size standard pipe
- Embossed ribs strengthen the hooks connecting the strap to the strut
- Highest load ratings of any universal break-apart strap in the industry
- UL® listed and CSA approved

For a sample of this product, please contact your local EESCO Branch!
